

FIRST CIRCULAR

WORKSHOP on ALTO PROSPECTS
February 5 – 7, 2018, Orsay, FRANCE

We are pleased to announce that the workshop on ALTO prospects will be held on February 5 – 7, 2018 in IPN Orsay, France.

ALTO 2.0 is the project of reliability and sustainability of ALTO within the framework of a national strategy

Reliability

The reliability of ALTO is planned according to 5 main axes: stable beams, radioactive beams, safety and nuclear safety files, target and ion sources R&D and finally electronics, acquisition and networks.

Sustainability and Physics Program

The sustainability of the ALTO facility consists in a clear definition of the future physics program. It also consists in ALTO's interaction with its national, European and international environment as part of a national strategy, and in the opening of ALTO to more industrial applications.

Two deliverables are planned as part of the ALTO 2.0 project:

- 1) **From 5 to 7 February 2018, the organization of the Workshop on ALTO prospects** will take place over three days: two days devoted to physics, and one day dedicated to the reliability.
- 2) **In April, the release of an ALTO 2.0 white book** summarizing all the reflexions and conclusions from the working groups.

Registration

Participants are invited to register before January 20th by using the form available on the web page. The event is free of registration fee. A dinner at the “Bouteille d’or” restaurant in Paris in front of Notre Dame will be offered to all registered participants.

Accommodation

A list of hotels close to Orsay is available on the conference website <https://alto2dot0.sciencesconf.org/>. IPN Orsay is about 35 mn from Paris by public transportation.
